

INTRODUCING YOUR NEW CATALOG

Find Books

A search box is at the top of every page. Choose the type of search from the drop down menu (Keyword, Title, Tag, List)

Enter your search terms.

Click search.

Search results appear in the middle of the screen.

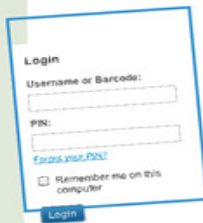

Narrowing Your Search

Look on the left for ways to narrow your search:

Format, audience, and others.

You can even limit your search to what's available now in the library.

LOGGING IN FOR THE FIRST TIME

The screenshot shows a login form with the following elements:

- Header: Login
- Field: Username or Barcode: [input box]
- Field: PIN: [input box]
- Link: [forgot your PIN?](#)
- Checkbox: Remember me on this computer
- Button: Login

Enter your Barcode

Your username is your 14-digit library card number (no spaces).

Enter your PIN (password)

Your password is PATRON, or the password you created in the previous catalog.

CREATING YOUR ACCOUNT

Enter your birth month and year.

This information is not required, but if you do not enter it, the catalog will assume you are a minor and will assign a username for you.

Create a username.

You can use this username instead of your library card number to log in. Also, this username will be listed with any content you add to the catalog.

Change your password.

It's a good idea to change your password from the default, which is Patron. Changing your password protects the privacy of your account information, since you will now be able to log in using your username.
